

# Dinamično jadranje

Aleš Mohorič

Presekov seminar za matematiko, fiziko in astronomijo

DMFA

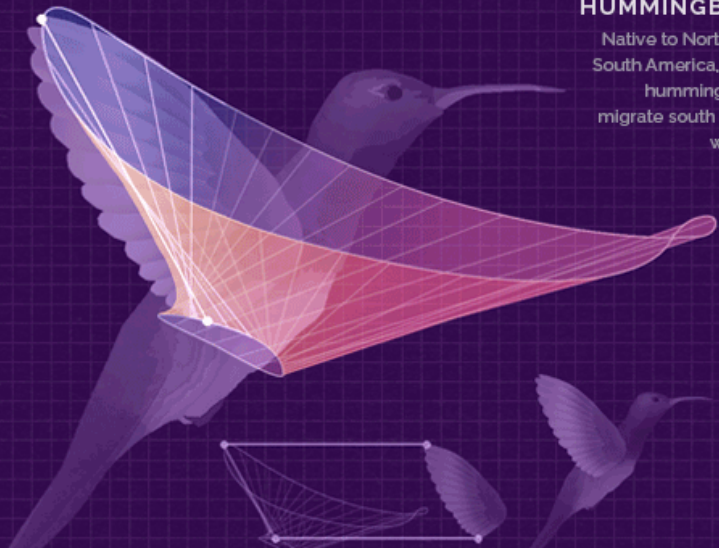

2022-23

An illustration of a Canada Goose in flight, with its wings highlighted in a gradient of orange, red, and purple. The wings are shown in a curved, powerful stroke. In the background, there are smaller, semi-transparent versions of the goose and its wings, along with a wireframe diagram of a wing showing the skeletal structure and feather arrangement.

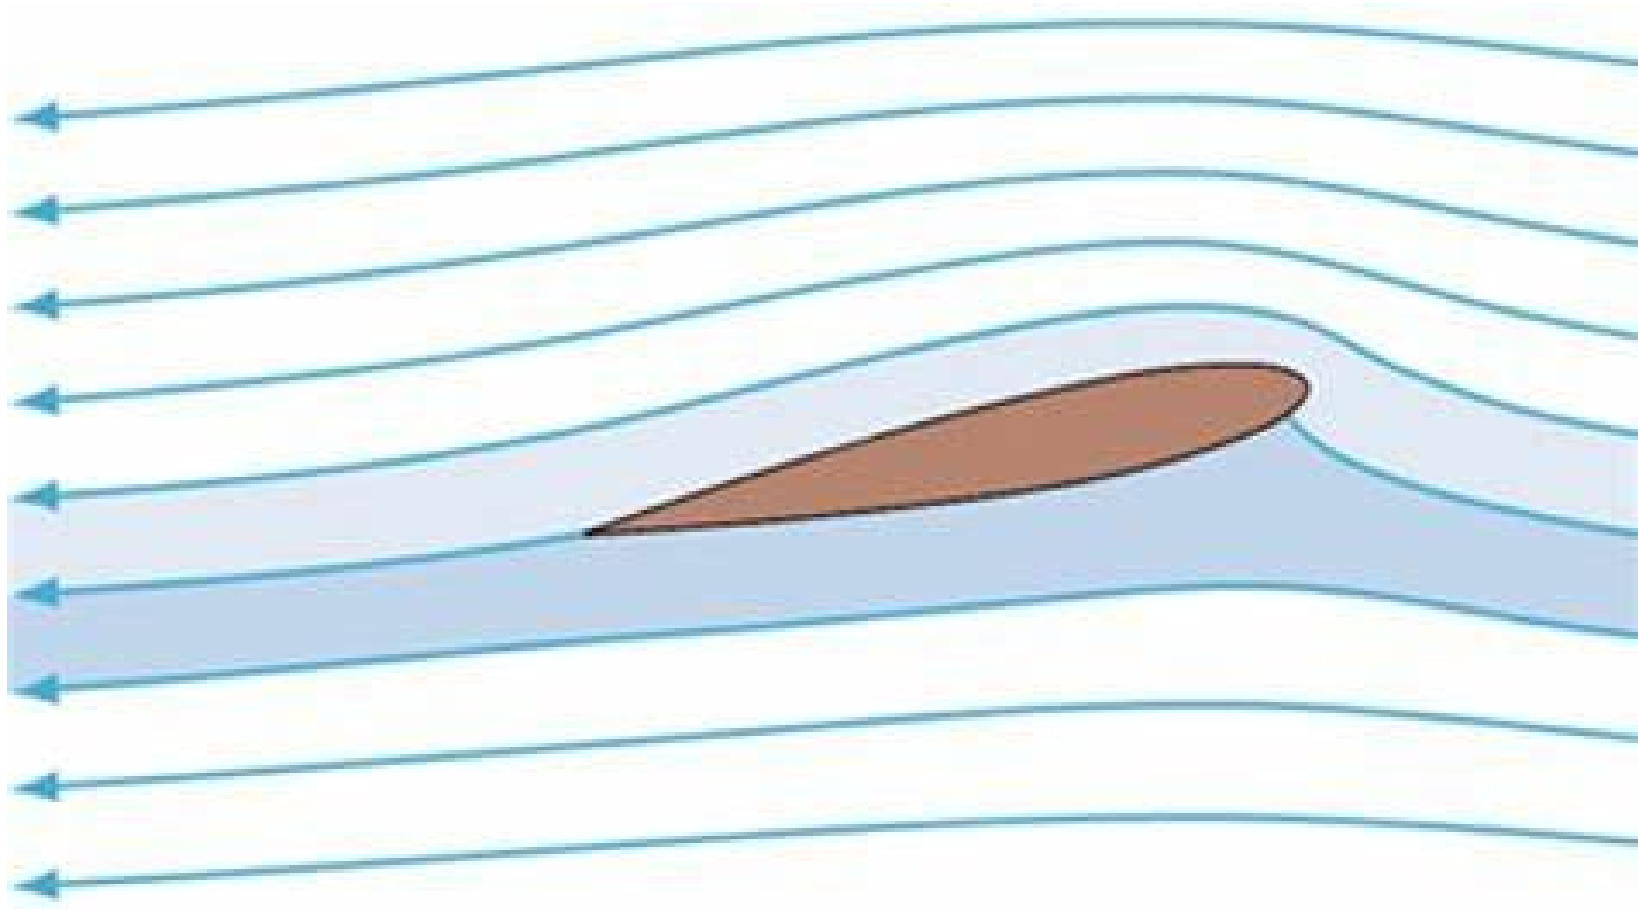

## CANADA GOOSE

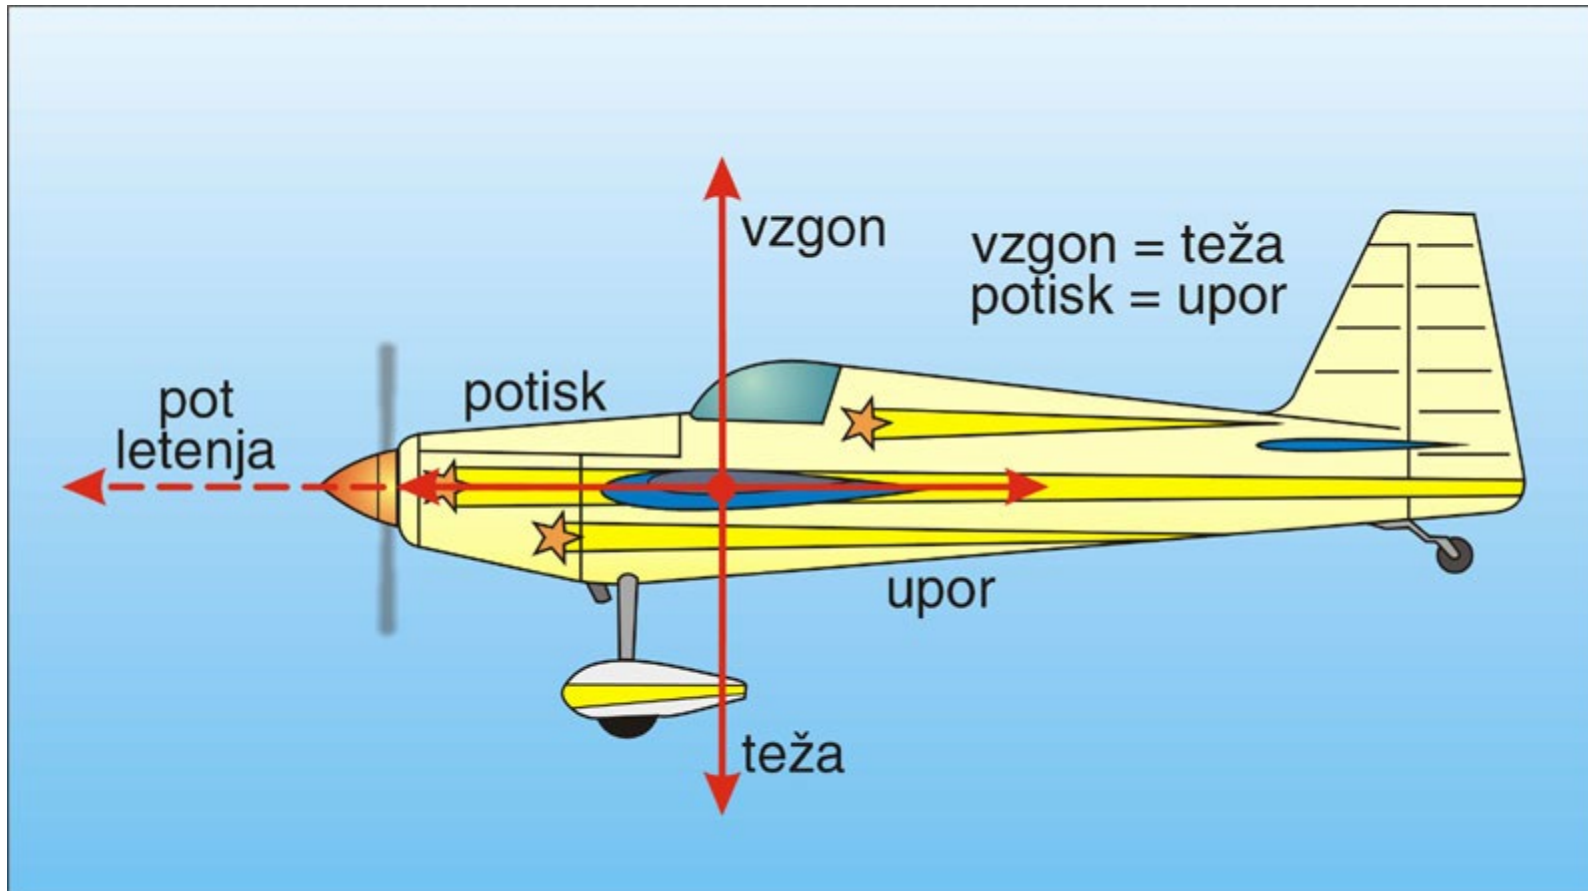

Found primarily in  
North America,  
Canada geese can  
weigh over 5kg. Males  
are territorial.

An illustration of a hummingbird in flight, with its wings highlighted in a gradient of blue, purple, and red. The wings are shown in a curved, powerful stroke. In the background, there are smaller, semi-transparent versions of the hummingbird and its wings, along with a wireframe diagram of a wing showing the skeletal structure and feather arrangement.

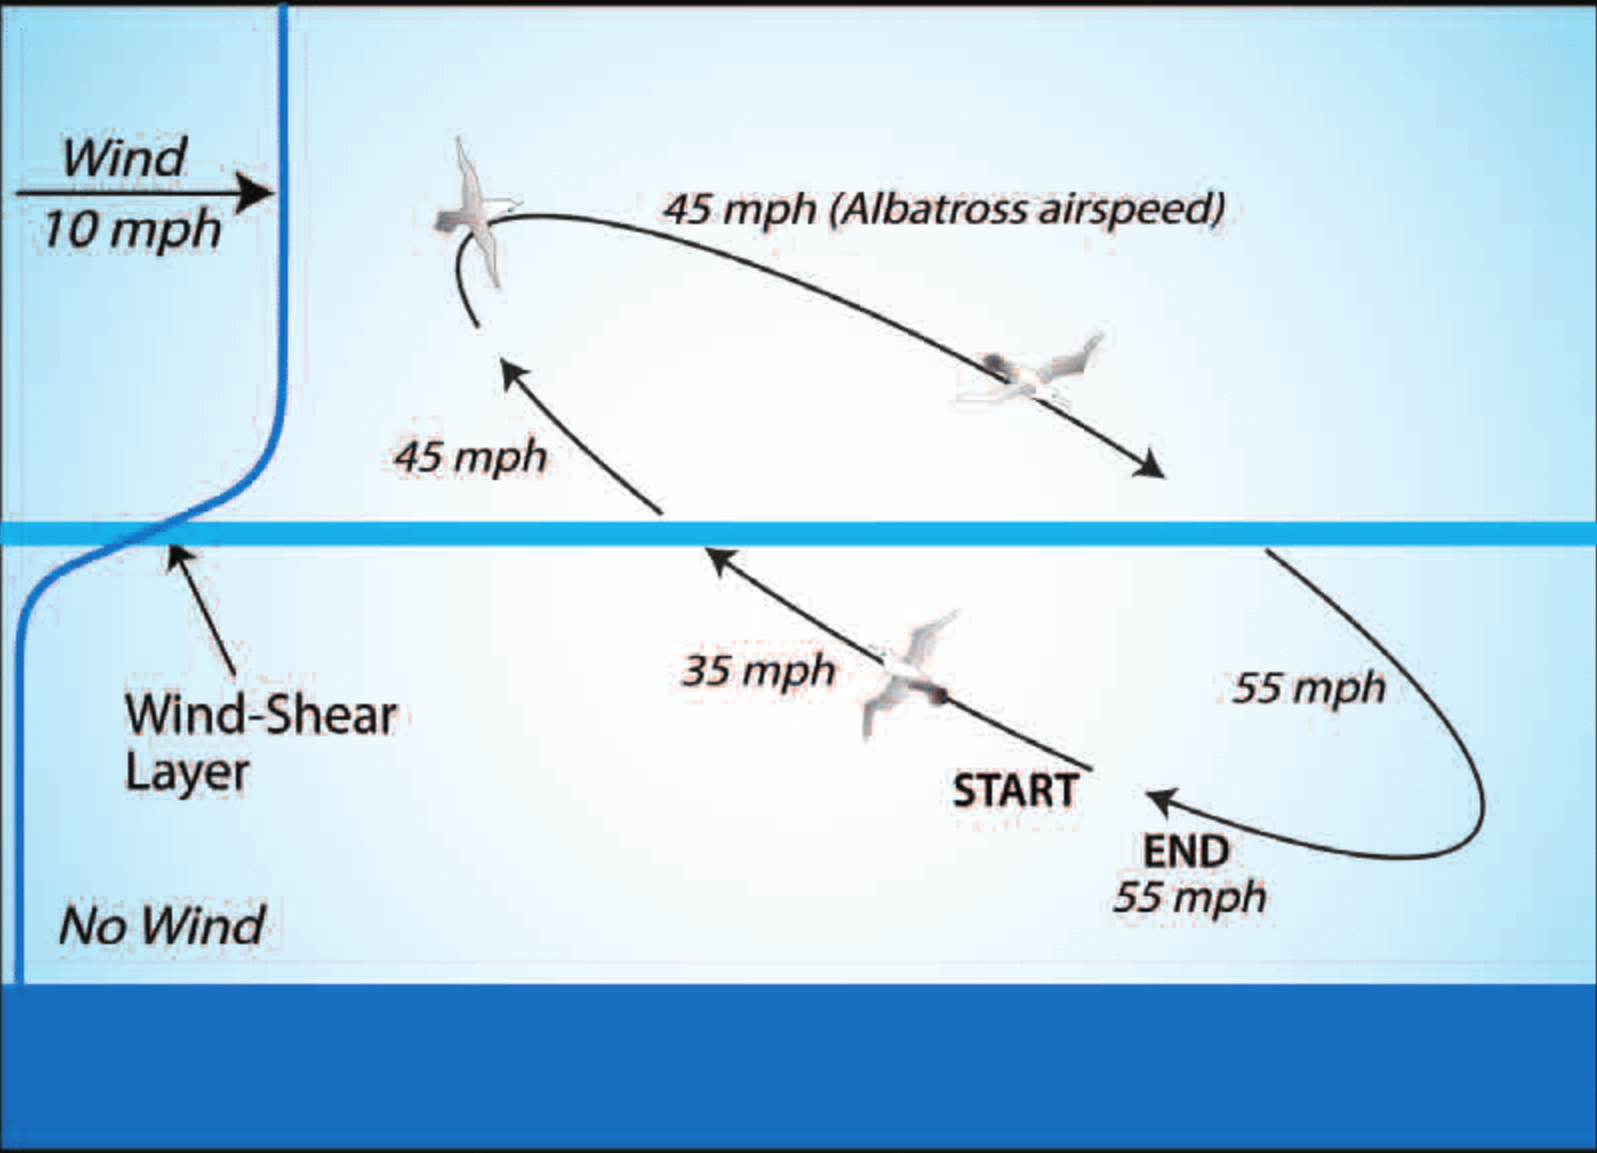

## HUMMINGBIRD

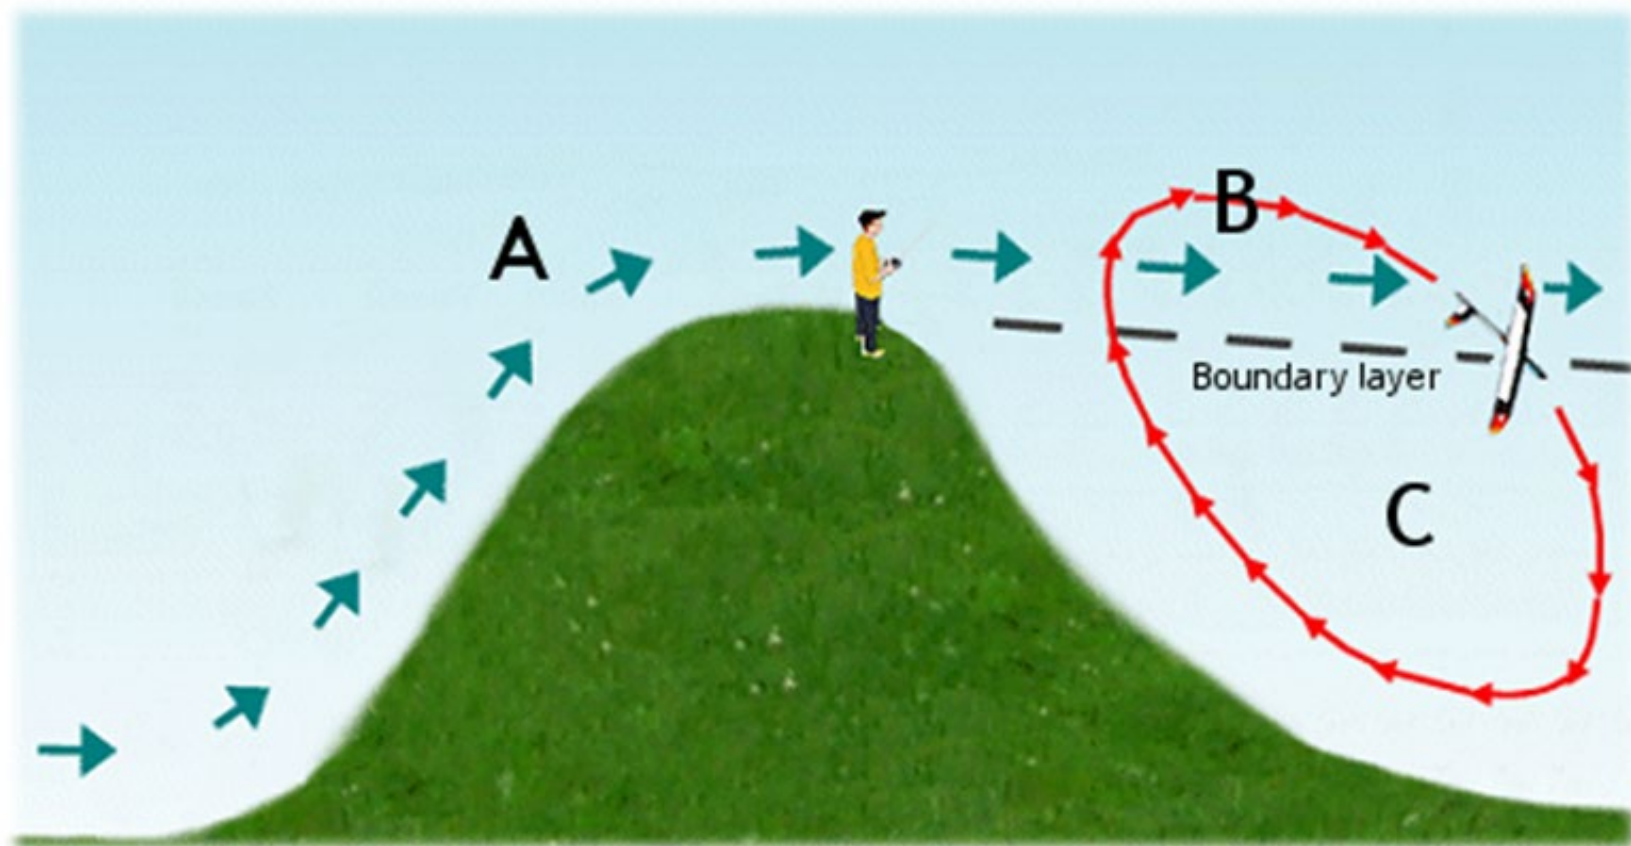

Native to North and  
South America, most  
hummingbirds  
migrate south in the  
winter.
